

**Eastman Park Micrographics Residual Thiosulfate Analysis**  
**Mar 2017**

eBeam Film LLC
Customer Number: 2345-2
Shelton CT

Your sample film strip has been tested for archival quality (residual thiosulfate concentration), in terms of micrograms/cm<sup>2</sup> S<sub>2</sub>O<sub>3</sub> = as defined by ANSI Standard IT 9.1.

A concentration of less than (<) 1.4 micrograms/cm<sup>2</sup> indicates archival quality. Greater than (>) 1.4 micrograms/cm<sup>2</sup> indicates non-archival quality.

---

Actual test readings are provided below, as well as "pass/fail" check marks.

Actual Concentration: .3 Micrograms/cm<sup>2</sup>

- Meets ANSI Standard (< 1.4 micrograms/cm<sup>2</sup>)
- Does not meet ANSI Standard (> 1.4 micrograms/cm<sup>2</sup>)
